HI AJ,
Validating the Edifact Invoices. Below is just the ZF values that I thought I would send to you while I look at others to compare. Let me know if you have any questions. Also when do you want to meet as you mentioned in the meeting.

Invoice 22864501

- UNH – If this is pulling from EDITPCX then we need to update to match current version/or ECOM has this in the mapping. Right now this info is hardcoded in the program based on the Array number (CMF043). Which means all shipto locations that have that array number get this info.

0192.00      *=============================================================*
```

- DTM - you have type 3 which I'm not sure what that translates to.
  - code type 137 – Document issue date time
  - Code type 1 – service completion date/time actual

- RFF – IV – invoice number in addition to what you have provided.
- NAD segment missing partner info (Pull from the Delfor as well as the system)
  - Pe - ZF PLANT NUMBER
  - VA - currently this is hardcoded – I sent email to Accounting to see if this value is in the system.
- LIN – the part number should look up IVCPARTS file and pull the customer preferred part IF it exists else it would be our part number. In this invoice case – there is a cross reference.
- PIA – not sure if you have this in the invoice . this is optional but I can see this information needed for others (additional part info) comes before the IMD

1090		**SG26**	R	900	1	**Line item section**
1110	40	**PIA**	O	1	2	**Additional article identifier(s) 1**

		Standard		Implementation		
Tag	Name	St	Format	St	Format	Remark
PIA						
4347	Product identifier code qualifier	M	an..3	M	an..3	**1 Additional identification**
C212	Item number identification	M		O		
7140	Item identifier	C	an..35	R	an..35	Information directly relating to the identification of an item by the seller's identification system. Note: The term article is synonymous to the term item. In the global joint automotive guidelines the term article is used.
7143	Item type identification code	C	an..3	R	an..3	**SA Supplier's article number**
1131	Code list identification code	C	an..17	N		Not used
3055	Code list responsible agency code	C	an..3	N		Not used
C212	Item number identification	C		O		
7140	Item identifier	C	an..35	R	an..35	Customs tariff code
7143	Item type identification code	C	an..3	R	an..3	**HS Harmonised system**
1131	Code list identification code	C	an..17	N		Not used
3055	Code list responsible agency code	C	an..3	N		Not used
C212	Item number identification	C		N		
7140	Item identifier	C	an..35	N		Not used
7143	Item type identification code	C	an..3	N		Not used
1131	Code list identification code	C	an..17	N		Not used
3055	Code list responsible agency code	C	an..3	N		Not used
C212	Item number identification	C		N		
7140	Item identifier	C	an..35	N		Not used
7143	Item type identification code	C	an..3	N		Not used
1131	Code list identification code	C	an..17	N		Not used
3055	Code list responsible agency code	C	an..3	N		Not used
C212	Item number identification	C		N		
7140	Item identifier	C	an..35	N		Not used
7143	Item type identification code	C	an..3	N		Not used
1131	Code list identification code	C	an..17	N		Not used
3055	Code list responsible agency code	C	an..3	N		Not used

Remark:
Example: `PIA+1+987654321:SA+101-22-33:DR+21:EC+1234567890:GS+RED001:CL'`

- DTM – code 1 type – service completion
- GIN – Currently we don't send but I can see setting this up and sending. BN = serial number as we could list this in the invoice.

1260	50	**MOA**	R	1	2	**Line item net amount in invoice currency**

		Standard		Implementation		
Tag	Name	St	Format	St	Format	Remark
MOA						
C516	Monetary amount	M		M		
5025	Monetary amount type code qualifier	M	an..3	M	an..3	**203 Line item amount**
5004	Monetary amount	C	n..35	R	n..15	Value of line item net amount in currency units - for currency refer to CUX segment (invoice currency)
6345	Currency identification code	C	an..3	R	an..3	Code specifying a monetary unit.
6343	Currency type code qualifier	C	an..3	N		Not used
4405	Status description code	C	an..3	N		Not used

Remark:
The line item amount is the total related to this line item. It includes rebates and additions but excludes payment discount and VAT.
Calculation furmula: Net price amount * invoiced quantity = (invoiced quantity * gross price) plus / minus allowances or charges.

Example: `MOA+203:1100:EUR'`

- MOA - lists the monetary unit.
- PRI – according to specs should be AAA not INV.

1340	52	**PRI**	M	1	2	**Price details**

		Standard		Implementation		
Tag	Name	St	Format	St	Format	Remark
PRI						
C509	Price information	C		R		
5125	Price code qualifier	M	an..3	M	an..3	The price stated is the net price including allowances/charges. **AAA Calculation net**
5118	Price amount	C	n..15	R	n..15	Unit price amount in price currency units
5375	Price type code	C	an..3	N		Not used
5387	Price specification code	C	an..3	O	an..3	The contract price is assumed to be the default net price. In retrospective price adjustments the old price (AAL), the new price (CON) and the price difference (ABM) can be used. **AAL Old price** **CON Contract price**
5284	Unit price basis quantity	C	n..9	O	n..9	Basis on which the unit price/rate applies.
6411	Measurement unit code	C	an..8	O	an..3	Code specifying the unit of measurement.
5213	Sub-line item price change operation code	C	an..3	N		Not used

Remark:
Calculation net price: Price including allowances and charges.

Example: `PRI+AAA:50::CON:100:C62'`

- RFF – dispatch note number (pack slip) with code AAU although wondering if ECOM is able to map to previously listed PK RFF value?
- MOA – 77 and 39 item values are larger than the total invoice amount. I just looked further and you are adding in Dunnage value which in this customer's case is NON-chargeable dunnage in the ALC area. We definitely need the ALC segment options for other customers but for dunnage need to check Dunusage/DUNEXCPT if it is exempt from price.
- ALC has the surcharge in the current.
