Hi AJ,

Reviewing the INVOIC :

1. ****152281 is a split invoice by part number which is controlled by CUSTOMER master setup.
   15228101 and 15228102 are the invoice numbers but shipped under PS 152281

You have it combined into one whereas we have to break it out as two invoices.

Here are the trustedlink transactions.

M3031038	S1	INVOIC	VOLVO MACK TRUCK
M3031037	S1	INVOIC	VOLVO MACK TRUCK

2. DTM 137 = document date issued . only sending 158 and 159. Not sure if horizon begin date would suffice for letting ECOM translate to type 137. Not sure if this is invoice date or not.
3. ALI – missing this segment - US - comes in as LOC but this is used for other details not sure I can cross segments like that.
4. GEI – missing on Volvo - discovered this is hardcoded in the mapping on trustedlink - is there a way we can derive this value or should we have Ecom add this?

VOLVO GLOBAL INVOIC D07A (AP)

Segment: GEI — Seq. No.: 9 Level: 1 Status: R Max. Occ.: 1 Counter: 0090 — **Processing information**

Name: **Processing indicator**

UN/EDIFACT			Implementation	
	Name	St Format	St Format	Use / Remarks
GEI				
9649	Processing information code qualifier	M an..3	M an..3	Used to categorize the invoicing domain (production materials). **PM Production material** Codes have been defined by GIP in JAI013 code list - to be used with code 272 in GEI.3055.
C012	Processing indicator	C	O	
7365	Processing indicator description code	C an..3	N	not used
1131	Code list identification code	C an..17	N	not used
3055	Code list responsible agency code	C an..3	R an..3	**272 Joint Automotive Industry agency**

Remark:
This segment shall be used to identify the type of products/services that are being invoiced, in this case PM = production material (also called AP = Automotive products).

Example:
GEI+PM+::272'

5. NAD segment missing partner info (Pull from the Delfor as well as the system)
   - Pe - ZF PLANT NUMBER
6. TDT – missing this in our send of invoices. Volvo Specs says this is mandatory but we are not sending this out today. However this should be able to clone from the DESADV.

7. QTY - code 47 vs 12 – I think we can get ECOM to translate this as 47 = invoiced values (which is what we send) but you are sending dispatched QTY - QTY of 36 is correct

```
DTM+134:20260330:102'
LIN+001++25154960:IN'
IMD+F++:::CAP'
QTY+47:36:PCE'
```

```
IMDF
QTY12 36          EA
MOA38 1931.40
PRIAAB45.24
```

8. PIA – not sure if you have this in the invoice as it didn't show up on the VOLVO invoice this is optional but I can see this information needed for others (additional part info) comes before the IMD. This could be our part number especially in the case of pulling the LIN segment pulling - IVCPARTS crossref customer part number.

1090		SG26	R	900	1	**Line item section**
1110	40	PIA	O	1	2	**Additional article identifier(s) 1**

		Standard		Implementation		
Tag	Name	St	Format	St	Format	Remark
PIA						
4347	Product identifier code qualifier	M	an..3	M	an..3	**1 Additional identification**
C212	Item number identification	M		O		
7140	Item identifier	C	an..35	R	an..35	Information directly relating to the identification of an item by the seller's identification system. Note: The term article is synonymous to the term item. In the global joint automotive guidelines the term article is used.
7143	Item type identification code	C	an..3	R	an..3	**SA Supplier's article number**
1131	Code list identification code	C	an..17	N		Not used
3055	Code list responsible agency code	C	an..3	N		Not used
C212	Item number identification	C		O		
7140	Item identifier	C	an..35	R	an..35	Customs tariff code
7143	Item type identification code	C	an..3	R	an..3	**HS Harmonised system**
1131	Code list identification code	C	an..17	N		Not used
3055	Code list responsible agency code	C	an..3	N		Not used
C212	Item number identification	C		N		
7140	Item identifier	C	an..35	N		Not used
7143	Item type identification code	C	an..3	N		Not used
1131	Code list identification code	C	an..17	N		Not used
3055	Code list responsible agency code	C	an..3	N		Not used
C212	Item number identification	C		N		
7140	Item identifier	C	an..35	N		Not used
7143	Item type identification code	C	an..3	N		Not used
1131	Code list identification code	C	an..17	N		Not used
3055	Code list responsible agency code	C	an..3	N		Not used
C212	Item number identification	C		N		
7140	Item identifier	C	an..35	N		Not used
7143	Item type identification code	C	an..3	N		Not used
1131	Code list identification code	C	an..17	N		Not used
3055	Code list responsible agency code	C	an..3	N		Not used

Remark:

Example: `PIA+1+987654321:SA+101-22-33:DR+21:EC+1234567890:GS+RED001:CL'`

9. GIN – Currently we don't send but I can see setting this up and sending. BN = serial number as we could list this in the invoice.

1260	50	MOA	R	1	2	**Line item net amount in invoice currency**

		Standard		Implementation		
Tag	Name	St	Format	St	Format	Remark
MOA						
C516	Monetary amount	M		M		
5025	Monetary amount type code qualifier	M	an..3	M	an..3	**203 Line item amount**
5004	Monetary amount	C	n..35	R	n..15	Value of line item net amount in currency units - for currency refer to CUX segment (invoice currency)
6345	Currency identification code	C	an..3	R	an..3	Code specifying a monetary unit.
6343	Currency type code qualifier	C	an..3	N		Not used
4405	Status description code	C	an..3	N		Not used

Remark:
The line item amount is the total related to this line item. It includes rebates and additions but excludes payment discount and VAT.
Calculation furmula: Net price amount * invoiced quantity = (invoiced quantity * gross price) plus / minus allowances or charges.

Example: `MOA+203:1100:EUR'`

10. MOA - lists the monetary unit but not surcharge correctly. This might be due to the combined invoices.
